Genus® LIBERATOR

APPLICATIONS

- Warehouses
- Storage Areas
- Loading Bays
- Abattoirs
- Bottling Plants
- Livestock Areas

Genus® Liberator has been designed to offer the highest level of flying insect control for the toughest of environments, with jet proof option for wash down, wet or damp areas.

Genus® Liberator is fast and easy to service, with front and back external grills hinging to allow both-hands-free servicing. The electronic fly killer (EFK) version has a high voltage grid that “zaps” flies that enter the unit and retain the carcasses in the large catch tray, reducing the need for servicing.

Made out of stainless steel, the Genus® Liberator can be wall mounted or suspended from the ceiling. Both EFK and ILT versions have IP45 rated jet proof options.

Easy Servicing Features

The Genus® Liberator’s unique hinged grills make servicing easy. Two quarter turn, wing nut screws release the catch tray. The grills are then clipped out of place to allow access to the tubes and glue boards and H.V grid (if fitted).

Features and Benefits

- Tool-free, fast and easy maintenance & servicing
- Splash & Jet Proof IP45 option available for wash-down, wet or damp areas
- Stainless steel construction
- Wall mounted or suspended location

Liberator Catcher ILT

The Insect Light Trap version has a large capacity, grid marked glue board to assist with HACCP compliance.

Order Code	Description	Dimensions mm (H x W x D)	Weight	Lamps
